RINGSIZE GUIDE

You can use this simple ring size guide to measure your finger easily at home.

Do you have an existing ring that fits your desired size? Follow option 1.

Do you need to measure your finger? Follow option 2.

Our ring sizes are in regular EU scale, in case you are still hesitating about your size, you can always measure your size in any jewellery shop.

Before Printing:

- The page scaling should be set to 'None' in your print options (print scale 100 percent).
- Print on standard A4 sized paper (210 × 297 mm).
- Your ring sizer should measure 130 mm in length.

Option 1: Measure an Existing Ring

1. Take an existing ring that fits your desired size.
2. Place the ring over the circles below in this guide until the inside circumference of the ring matches a specific circle.
3. To assure that the size is correct, you can cut the chosen circle and make sure it fits inside the ring.
4. If your ring falls in between two sizes, consider the width of the band. A wider band may require a slightly larger ring size.

Option 2: Use Ring Sizer to Measure Finger

1. Print and carefully cut out the below ring sizer. Cut a hole in the indicated place of the sizer.
2. Place the end of the ring sizer through the indicated slit to form a loop.
3. Wrap the loop around your finger with the letters side visible. The letter that appears closest to the slit is your ring size.
4. Consider that in the evening, in hot or in stress, your fingers might be half size bigger than normally.
